

RIPPER®
Heavy Duty
Tungsten Carbide Hole Saws

Bordo's range of RIPPER Heavy Duty Tungsten Carbide Hole Saws are ideal for cutting:

- Timber
- Composite boards including MDF
- Australian hardwoods
- Plywoods including form ply
- Wood laminates
- Cement sheet

Heavy duty abrasion resistant tungsten carbide teeth cut materials that quickly dull normal hole saws. Large gullets enable easy slug removal and extra thick side walls ensure they keep performing even in the toughest trade conditions.

RIPPER Hole Saws have a huge 60mm max. cutting depth and are available either individually, with hang tabs, or as a set in a heavy duty PVC case.
