

Blu-Mol® Bi-metal Hole Saws

Blu-Mol® has been the world-leader in bi-metal hole saws for many years. Widely recognised as the professional's choice our general-purpose hole saws have proven to be tougher and more durable than other brands.

Whether used in carefully controlled machinery, in the workshop or on the construction site, Blu-Mol® hole saws have stood the test of time. Our electron-beam welded M3 teeth give superior wear and impact resistance – and with the largest range of hole saws and mandrels in the market you can be sure that Blu-Mol® have the cutting solution for you.

Blu-Mol® hole saws remain the #1 choice for professionals around the globe - their robust construction ensures they can be used over and over in materials as diverse as wood, plastic, composite board, steel and stainless steel.

Need a specialised hole saw?

Bordo International is Australia's leading supplier of general purpose and specialised hole saws. While Blu-Mol® bi-metal hole saws are the best general purpose hole cutters available, there are applications when a specialised hole saw is needed. Bordo® has the answer!

Use RemGrit® tungsten carbide grit hole saws to cut abrasives such as tile, fibreglass, marble and cement sheet.

Use Blu-Mol® tungsten carbide tipped hole saws to cut wood laminates, plywood, particle board and insulation.

Use Bordo® tungsten carbide tipped sheet metal cutters to cut perfect holes in steel and stainless steel sheet.

Use The Aggressor® with built-in arbor when you need to cut a deeper hole or you need a more positive tooth rake.

Use Bordo® tungsten carbide tipped Core Bits to power through almost all masonry material such as brick, concrete, granite, bluestone and reinforced concrete.
