

RemGrit® Tungsten Carbide Grit Hole Saws

RemGrit tungsten carbide grit hole saws and saw blades are ideal for cutting hard and abrasive materials. The tungsten carbide grit is permanently bonded to an alloy steel blank at high temperature creating a long lasting and robust tool.

Bordo's range of RemGrit® Hole Saws and Saw Blades are ideal for cutting:

- Marble
- Composite materials
- Rubber
- Aerated concrete
- Natural stone
- Fibreglass
- Cast iron
- Plaster
- Most tiles
- Reinforced plastics
- Cement sheet

RemGrit® products offer high heat and abrasion resistance in extremely hard and abrasive materials. There are no teeth to dull or chip resulting in smooth cutting and a resistance to snagging. The RemGrit® Hole Saws feature a 29mm (1-1/8") cutting depth and a 4.75mm (3/16") heavy duty backing plate. RemGrit® Hole Saws are fully compatible with the complete range of Blu-Mol® mandrels, adaptors, pilot bits and extensions.

RemGrit® Tiler's Hole Saw Kit, 9 Piece
